

Software Requirements Specification (SRS)

Project Title : SkillLink (Bridging Student Skills with Community Needs)

1. Introduction

1.1 Purpose

The purpose of this project is to create a platform where students can showcase their skills and connect with people who need their services. It helps students earn money, gain experience, and build confidence while making it easy for customers to find skilled and affordable local talent..

1.2 Scope

The system allows:

- Students to register and showcase their skills.
- Customers to search and hire skilled students.
- Booking and service management.
- Secure communication between customers and students.
- Ratings and reviews to build trust.

2. Functional Requirements

2.1 User Registration

- Customer registration and login.
- Student registration and login.
- Profile creation with personal details.

2.2 Student Profile

- Add skills and services.
- Set service charges.
- Upload certificates or portfolio (optional).
- Update availability.

2.3 Customer Features

- Search students by skill or location.
- View student profiles.
- Book a service.
- Cancel bookings.
- Track booking status.

2.4 Booking Management

- Send booking request.
- Student accepts or rejects the request.
- Update booking status (Pending, Accepted, Completed, Cancelled).

2.5 Reviews & Ratings

- Customers can rate students.
- Customers can leave reviews after service completion.
- Display average ratings.

2.6 Notifications

- Booking confirmation.
- Booking updates.
- Service completion notification.

2.7 Admin Module

- Manage users.
- Verify student accounts.
- Remove fake accounts.
- View reports and platform statistics.

3. Non-Functional Requirements

- Performance: Pages should load within 3 seconds.
- Security: User passwords must be encrypted.
- Availability: System available 24×7.
- Usability: Easy-to-use interface.
- Reliability: System should handle multiple users without crashing.
- Scalability: Support future expansion to more cities and services.

4. Hardware Requirements

- Processor: Intel Core i3 or above
- RAM: 4 GB minimum
- Storage: 20 GB free space
- Internet Connection

5. Software Requirements

- Operating System: Windows/Linux
- Frontend: HTML, CSS, JavaScript, Bootstrap
- Backend: PHP / Node.js / Java (based on project)
- Database: MySQL
- Web Browser: Chrome, Edge, Firefox

6. User Roles

- Customer
- Register/Login

- Search services
- Book students
- Rate and review
- Student
- Register/Login
- Manage profile
- Accept/Reject bookings
- Complete services
- Admin
- Manage users
- Verify students
- View reports
- Handle complaints

7. System Modules

- Authentication Module
- Student Management Module
- Customer Management Module
- Search Module
- Booking Module
- Payment Module (Optional)
- Rating & Review Module
- Notification Module
- Admin Module

8. Expected Outcomes

- Customers can easily find affordable and trusted skilled students.
- Students gain part-time earning opportunities.
- Faster service booking.
- Increased trust through verified profiles and ratings.
- Improved local employment and community engagement.
